

## Stephen W. Hinkle, O.D. and Alicia Boyles, O.D.

### *Ashburn Vision Source*

We pride ourselves on providing our patients with the best possible standard of care; **because of this we now perform the Optomap Retinal Exam with all of our patients.** This non-invasive procedure allows for a much broader and more detailed view of the retina than is possible with conventional methods. When reviewed, the scan becomes a permanent part of your medical file, enabling Dr. Hinkle and Dr. Boyles to make important comparisons should potential vision threatening conditions arise. **Dr. Hinkle and Dr. Boyles strongly believe that the Optomap Retinal Exam is an essential part of your comprehensive eye exam and prescribe it for all of their patients once per year.**

There will be no charge to capture Optomap images as part of your pre-test work up. If the doctor reviews the images, then there will be a charge. The \$40 charge for adults and \$25 charge for minors is not covered by insurance unless being used to actively follow disease. Any questions you have about the Optomap exam can be directed to Dr. Hinkle or Dr. Boyles.

Please check an option below:

Yes, I want the doctor to review my scans       I would prefer to speak with the doctor  
before reviewing my scans
